

## 505 SENTENCE SEQUENCING A

### PRODUCT CONTENTS

MANIPULATIVES: 12 pages (24 sets)

ANSWER KEYS: 4 pages

7 pages of teacher information

#### Ruby, the Painting Pachyderm

Ruby was born in Thailand in 1973, before elephants became an endangered species.

The baby elephant was put in a crate and sent to a zoo in Phoenix, Arizona.

When she got there, her trainer named her Ruby after the world's most precious jewel.

Ruby's keepers noticed that she often drew patterns in the dirt of her pen.

They then began to use rewards to teach her to use her trunk to paint on canvas.

Ruby's bold, vibrant paintings raised hundreds of thousands of dollars for the zoo.

The zoo bred their talented elephant in 1998, but sadly, Ruby and her fetus both died.

### SKILL DEVELOPMENT

All sets or cards in Reading Manipulatives products are different. Once students are introduced to the skills and shown how to do the activity, they work independently. The individualized materials can be used for seatwork or stations. Students work on needed skills, and teachers are freed for instruction.

This guide includes a summary of the skills targeted by this product. Additional teaching aids can be downloaded from the resource section of our web site ([www.readingmanipulatives.com](http://www.readingmanipulatives.com)).

### MATERIALS PREPARATION

PDF pages are designed to be printed on 8.5 x 11 inch sheets. Cover-weight paper in a variety of colors is available at office supply stores or online. Lamination is recommended so materials will last.

All Reading Manipulatives pieces have a code that is used for maintaining set integrity and student recordkeeping. The first part denotes the product, followed by a hyphen and the set number.

Put student sets in zipper bags. Answer keys can be kept in the bags or stored separately. Select containers for the 24 student sets that hold and display the sets most efficiently.

### ANSWER KEYS & STUDENT CHECKLISTS

Answer keys are provided because active involvement builds accountability. When done thoughtfully, students learn from checking their work and analyzing any errors they make. Manipulatives encourage cooperative learning. Students should be allowed to assist one another as a need arises.

Checklists are important for tracking the materials that have been completed. The last page of this guide is a master for student checklists that can be copied and cut.

Nick was making Mom a cake because it was her birthday.

SQA-3

He followed the directions and added eggs and water to the cake mix.

SQA-3

Then he stirred the batter until the lumps were gone and poured it into a pan.

SQA-3

Nick put the cake in the oven to bake and set the timer.

SQA-3

He decided to go outside and throw the ball to his dog while the cake was baking.

SQA-3

Nick couldn't hear the buzzer, and the cake burnt by the time he remembered it.

SQA-3

Dad saved the day by picking up a birthday cake on his way home.

SQA-3

## The Forgotten Cake

SQA-3

Italo sold ice cream from his pushcart in the streets of New York City.

SQA-4

It took him lots of time to wash the glass dishes, and people sometimes broke them.

SQA-4

Finally, in 1896, Italo thought of a way to solve the dish problem.

SQA-4

He baked a thin cookie and rolled it up into the shape of a horn.

SQA-4

Then he scooped ice cream into the cone.

SQA-4

Italo's customers thought this was a great idea and liked eating his tasty cones.

SQA-4

His ice cream cones became very popular, and Italo made a lot of money.

SQA-4

## The First Ice Cream Cone
